

→ Getting Started

1. Print this card on a sheet of non-reflective white paper and then put it on a rigid flat surface.
2. Connect a usb webcam to your computer.
3. Visit www.mxrcorp.com/wizcards/SingaporeFlyerInAR
You will be prompted to install the MXR plug-in the first time.
You only need to install this plug-in once.
4. Once the MXR plug-in is installed, the webpage will refresh automatically.

☞ How to Play

1. Bring this card into the webcam's view range and enjoy the 3D Singapore Flyer pop-ups! Rotate the postcard and you can see different angles of the 3D modeling.
2. Use your finger to tap on the marker  to interact with the 3D modeling! Tap the marker, rather than leave your finger over the marker for too long.
3. Move the card to the bottom-left corner of the screen, so that the marker will be within the magic circle, and the Singapore Flyer video will appear!

💡 Tips

1. Ensure the MXR plug-in has been installed successfully.
2. Ensure your webcam is working properly.
3. Ensure the surrounding lighting is not too dark or too bright.
4. Ensure the card is within the webcam's view range, with the marker facing the webcam.
5. Ensure the marker on the card is not covered.
